OUR SERVICES

We design propulsion solutions and cutting edge engines' systems for a safer, simpler and more pleasant navigation.

TESTING

FNM plant has a “certified” test center where engines are submitted to all technical tests and necessary stress tests for evaluating performance and engine’s reactions.

MARINE ENGINES INSPECTION

FNM can count on a valuable engines’ inspection program, the same used for new engines, ensuring the same quality standards, painting singles parts, testing the engine on the test bench and certifying performances and assembly.

TECHNICAL DOCUMENTATION

We internally draft all documents for engines’ management: use and maintenance manual, spare parts catalogue, BOM, workshops manual.

PARTS MANAGEMENT

FNM guarantees the correct management of engine’s parts according to customers needs, drafting a precise technical document.

SPARE PARTS LOGISTICS

FNM has an internal spare parts warehouse and an integrated logistics organization to guarantee high standards and reduced time for spare parts supply chain, either to dealer or to customers, and especially to the after market.
